Manufacturers - Test and Measurement

Associated Research, Inc.

<http://www.arisafety.com/> -- Manufactures automated multi-function electrical safety compliance analyzers and manual bench-top instruments for the electrical safety compliance testing industry. AC and DC Hipots, Ground Bond, Insulation Resistance, Functional Run Test, and Line Leakage testers.

Associated Power Technologies

<http://www.aptsources.com/> -- Leading manufacturer of linear and switching AC power sources, and provides solutions for 1 phase or 3 phase applications with output power capabilities from 500 VA to 18 KVA. APT provides a 2-Year warranty and 24 hour shipment on new orders.

Comtest/DMAS

<http://www.comtestengineering.com/> -- Comtest Engineering supplies high performance RF shielded rooms, reverberation and anechoic chambers.

These chambers are designed to meet the current international and domestic standards and are provided as complete turn-key facilities. GTEMS are also offered in a variety of sizes.

<http://www.dmas.eu/> -- DMAS polystyrene absorbers have been designed to meet the latest EMC and microwave test facility requirements. The product range consists of both hybrid (EMC) and broadband microwave absorbers, are REACH and ROHS compliant built under tight quality control according to ISO 9001:2008 and ISO 14001:2004. Covering Frequency range of 20 Mhz-110 Ghz.

Curtiss-Wright

<http://www.cwc-ae.com/> -- Designs and manufactures rugged data acquisition, recording and controller sub-system solutions for the aerospace market. CWC-AE's core capabilities include certified system and software integration.

Eaton

<http://www.epdu.com> -- Designs and manufactures AC power distribution and control products for commercial, government, military and aerospace industries (formerly Pulizzi Engineering, Inc.). Intelligent Power Controllers, Transfer Switches, Multi-function, Multi-Outlet, Metering, Monitoring, Remote Control capabilities.

Graphtec America

<http://www.graphtecamerica.com/> Graphtec America offers multi-channel data logger & data acquisition instruments. These industry leading instruments are portable, scalable and can operate stand alone or remotely via wired or wireless connection. Sampling rates as fast as 1usec, voltages up to 1,000V and up to 1,000 channels with powerful, easy to use software included.

FEI-Zyfer

<http://www.fei-zyfer.com/> -- GPS Time and Frequency systems. Solutions for Military GPS Synchronization, Satellite Ground Stations, Wireless Communications, and Network Timing.

HV Technologies

<http://www.hvtechnologies.com/> -- HV TECHNOLOGIES offers products and services across the entire spectrum of EMC immunity and emissions test requirements and standards—MIL-STD, Avionics/DO 160, Commercial IEC, CISPR, IEEE and ANSI, Automotive ISO, SAE. HV TECHNOLOGIES has a long history of providing high-end EMC test equipment along with a strong history of exceeding customer expectations. Through exclusive partner relationships, we can offer the highest quality products that come with the best support structure available.

Nexio

<http://www.nexiogroup.com/> -- NEXIO is specialized in EMC test software applications. Since 1995, NEXIO has developed software to automate EMC testing, such as Immunity, Emissions, Reverberation, Transients, Bursts, and Surge. NEXIO software is independent from any EMC equipment manufacturer and develops drivers for all manufacturers. Our driver library is 500+ strong, continues to grow, and there is no charge for drivers. Customers include every major market sector; Aerospace & Defense, Automotive, Aviation, Medical, ITE, Education, and Industrial.

NH Research

<http://www.nhresearch.com/> -- Designs & manufactures power-electronics test instruments, automatic test systems, high power AC and DC programmable loads & sources. NH Research products are used worldwide by manufacturers in the switching power supply, UPS, computer, telecommunications, industrial controls, automotive and defense industries. Bi-Directional Systems for Hybrid Batteries and Power Electronics development and testing.

RADX Technologies

<http://www.radxtech.com/> -- RADX Technologies® develops the LibertyGT® Family of Modular, COTS, Software-Defined Real-time Automated Test Systems (ATS) and Signal Analyzers. Selected by Frost & Sullivan for a 2014 New Product Innovation Award, the LibertyGT Family sets a new standard for cost-effective, high-throughput, multifunction, real-time test and measurement of commercial and military radios, avionics, wireless communications, RADAR and other RF and microwave systems-- where the combination of programmability, ease-of-use, flexibility, performance, throughput, long life cycle support and low TCO is important. The NEW 26.5 GHz LibertyGT 1410 Achieves Watershed 100% POI with Full Accuracy on 320 Nanosecond Minimum Duration Signals by Harnessing 765 MHz Analysis Bandwidth and up to 62 Million FFTs per Second DSP Throughput Capability.

Siglent Technologies

<http://www.siglentamerica.com> -- Siglent Technologies is a ISO certified manufacturer of electronic test instrumentation. Being the largest oscilloscope manufacturer in China (by shipments) Siglent manufactures a line of Oscilloscopes (Benchtop and Battery-Powered handheld models), Arbitrary Waveform Function Generators, small Programmable Linear DC Power Supplies, DMMs, and Spectrum Analyzers to 3.2 GHz. They offer 3 year warranty and all sales and service is done from their Solon, OH facility.

Transient Specialists

<http://www.transientspecialists.com> -- Transient Specialists, founded in 1982, provides EMC Test Equipment Rental Services, throughout the United States and Canada. We carry equipment to test compliance to commercial, military, and automotive EMC standards. We have flexible rental terms, including weekly rentals, and no rental charges during 2 days of transit time. Our equipment has accredited calibrations and we offer technical support on equipment set-up.

ZES ZIMMER

<http://www.zes.com> -- ZES ZIMMER is a German maker of precision AC and DC power analyzers, sensors and accessories. Our instruments offer a proprietary and invaluable advantage when measuring inverters, frequency converters and other PWM applications. They feature bandwidth to 10MHz, advanced filtering, easy waveform display and export, automated test and an intuitive user experience. Up to 8 channels (elements) and speed/torque inputs in a single meter. Sold from Local Office in Michigan.
