Territories

Michigan
Northwest Ohio**Advanced Technical Materials (ATM)**

Designs, manufactures, supplies, and stocks coaxial, waveguide RF and microwave components subsystems for commercial and military markets.

**American Technical Ceramics (ATC)**

Designs, develops, manufactures and markets products for RF, microwave and millimeter-wave applications. ATC is primarily focused on the wireless communications infrastructure, fiber optic, medical electronics, semiconductor manufacturing equipment, defense, aerospace and satellite communications markets.

**Amphenol RF**

Designs, manufactures and supplies RF interconnect systems for the automotive, broadband, instrumentation, internet, military/aerospace and wireless infrastructure markets.

**C&D Technologies, Inc.**

Produces and markets systems for the power conversion and storage of electrical power, including industrial batteries and electronics. Specializes in reserve power systems, electronic power supplies and material handling systems for the telecommunications, data transmission, infrastructure computer systems and utilities industries.

**Cuming Corporation**

Provides innovative materials including syntactic foam flotation and insulation equipment for microwave equipment, electronics, telecommunications, defense and aerospace industries.

**Micro-Coax**

Specializes in RF and microwave transmission line products and serves the defense, telecommunications and test/measurement marketplace.

**PA&E (formerly Pacific Aerospace and Electronics)**

Specializes in hermetic electronics packaging and broadband filter products for the defense, space, medical and commercial industries.

**Vanguard Products**

Focused on engineered high performance elastomers. Specializes in extrusions, coextrusions, moldings, cut parts and custom assemblies for most industrial markets, including aerospace, aircraft, appliances, architectural, automotive, electrical, electronics, food processing, hydraulics, instrumentation, machinery, marine and medical.

**XTech**

Supplier of mechanical systems for circuit board technology and other embedded systems. XTech products are used across a wide range of industries including telecom, GPS, wireless, instrumentation, security, medical, data storage, broadband and VoIP.
